

# Attoumani Sylvain

## Web Developer

(646) 381-09 19  
[sylvain.attoumani@gmail.com](mailto:sylvain.attoumani@gmail.com)  
New York City

Passionate about computer science and new technologies. Working as a backend developer, I am confident in creating powerful and optimized solutions as well as always trying to improve and implement new techniques in my work.

I enjoy working with php, Javascript, elasticsearch, NodeJs, React...

---

### TECHNICAL SKILLS

- Php7, HTML5, CSS3, Javascript, Twig.
- Symfony, Laravel, VueJS, NodeJs, React, JQuery
- SQL, Elasticsearch
- Git, Scrum, Agile
- Windows, Linux, MacOS

---

### EXPERIENCE

---

#### **MANDARINE ACADEMY, France - Web developer**

April 2018 - November 2019

As a web developer for Mandarin Academy, I created training platforms for multiple clients. This included a powerful back office with the main aim of the project being to maintain and implement new features for both the front and back offices.

Technical environment: Windows 10 - WSL - Docker then Linux Ubuntu / symfony 2.8 - PHP 7.2 - Javascript - twig - MySql (doctrine)

- Maintenance and creation (development and UX design) of training platforms (Mooc) for multiple clients.
- Implementation of new features for both the front office and the back office.
- Integration of elasticsearch: Adaptation on the symfony model and optimization of the search engine.

I also worked with symfony4 on a project to create and adapt the system to function better with a REST API.

Technical environment: Linux Ubuntu / symfony 4 / php 7.3 - Javascript - twig - MySql (doctrine) / Postman

- Implementation of new features for the back-office.
- Creation of API Rest features.

In addition of my technical expertise I helped choosing and training co worker :

- Supervision of a trainee student: Providing training on symfony and methods for assigning project architecture.
- Supported the recruitment process of student interns.

## **RUBEE COMPANY, France — *Web developer***

April 2017 - December 2017

As the only full-time developer at e-commerce company Rubee Company, my main aims were to ensure continuity throughout our work as well as maintain the functionality and redevelopment of the back office for the company as a whole.

Technical environment: MacOS / symfony 2.8 - vueJs - MySql  
(doctrine) - Vagrant

- Back-office Improvement and maintenance.
- Integration of elasticsearch : Adaptation on the symfony model and optimization of the search engine.

Technical environment: MacOS / Prestashop - MySql

- Integration of elasticsearch: Integration to prestashop and UX design.
